Ellen Park

New York, NY | ellenpark781@gmail.com | LinkedIn.com/in/epark78 | Portfolio

Software engineer with 4 years of experience building technical solutions and improving user experiences. Experienced in translating user and stakeholder needs into functional software, identifying workflow improvements, and independently designing and shipping applications. Brings a multidisciplinary background in psychology, art, and technology.

Skills

Product: Requirements definition, user workflow analysis, feature scoping, UX design
Technical: Java, JavaScript, TypeScript, React, Angular, Spring Boot, MySQL, REST APIs

Experience

Full Stack Software Engineer
JPMorgan Chase – CCB Digital Automation
October 2021 – October 2025

- Analyzed 500+ failing monitors and identified customer onboarding errors as the source of over 30% of failures; initiated an onboarding improvement epic to address root causes and reduce recurring manual support.
- Identified friction in the registration experience, resolved high-impact defects, and proposed a stepper-based redesign with real-time validation; presented the design for review and helped reduce registration-related support tickets from 2+ per day to zero after launch.
- Built a dynamic Team Contacts API to replace static YAML configurations, enabling contact management and certification reporting for 138+ teams.
- Built a Python automation tool integrating Bitbucket commits and Jira tickets to generate release notes, reducing preparation time from approximately 60 minutes to 10 minutes per release.

Product Projects

- **Pomodoro Focus Timer App | iOS/macOS | Published on the App Store**
  Designed, developed, and published a focus timer app, defining core functionality and interaction patterns for focus sessions, break management, and progress tracking.
- **Personal Productivity & Planning App | iOS | In Progress**
  Designing a productivity app combining tasks, scheduling, and habit tracking; defining MVP scope, user flows, and feature requirements.

Education & Certifications

Columbia University – Engineering Coding Bootcamp Certificate

Boston University – B.A. in Psychology and Art History | Dean's List, 4 years

AWS Certified Cloud Practitioner

Volunteer

JPMC Force for Good

- Partnered with Natural Areas Conservancy to improve Tableau data visualizations, translating nonprofit stakeholder needs into clearer reporting and insights.
